WHITE BLACKBERRY

"ICEBERG"

**Originated by Luther Burbank, who describes it
as follows :**

"One of the great grandparents of 'Iceberg' was Lawton. The first generation of seedlings, when crossed with Crystal White, was all black; the second also, though varying much in other respects; but the third produced this wonderful plant, bearing the snowiest white berries ever seen.

"Very little attention was paid to the long rows of cross-bred descendants, until one day this berry was discovered among its black relatives, with the canes bending in various directions with their load of delicious, snowy berries, which are not only white, but so transparent that the seeds, which are unusually small, may be seen in the berries when ripe.

"Clusters larger than those of Lawton; berries, as near as could be judged, were at least as large, earlier, sweeter, and more tender and melting throughout, though as firm as Lawton is when ripe."

Strong plants of the Iceberg Blackberry, \$7 per 100, \$60 per 1,000.

French-grown Seedlings.

Pear, Mahaleb, Mazzard, Angers Quince, Myrobalan. Prices upon application.

My usual list of various sizes of above, to be shipped from my cellars, as well as of a very complete list of Ornamental Seedlings and Evergreens, will be issued in January. Special prices can be made now upon this line.

Parties desiring special lists or sizes in new or rare ornamentals, will do well to submit same to me for estimate, as I give such my personal attention when in Europe each season, and can give customers the benefit of a large experience in this branch.
